

MOBILE PAYMENTS. TEAM UP YOUR CREDIT CARD WITH YOUR PHONE.

Today's smart phones are capable of doing amazing things. With a compatible Apple®, Samsung, Android® or Windows phone (or device), it's possible to pay without ever pulling out your card.

Streamline check out

With mobile purchasing, at check out, you'll use your phone instead of swiping your card. Typically, you'll just hold your phone near the terminal and okay your purchase with a fingerprint.

Simple to setup

It doesn't matter whether you use Samsung, Apple, Android or Microsoft Wallet—setup is simple for each technology. In most cases, you add your card with your phone's camera.

Security smarts

Handing over your card at a merchant exposes your card's information. With mobile purchases, instead of sharing your information, a virtual card number is created. That virtual number is used for purchases—keeping your data safe.

If you don't already have a credit card, talk to a branch sales representative today! To learn more about mobile purchasing, visit myaccountaccess.com/digitalwallet.

Explore mobile purchasing for yourself. Add your credit card today.
